

The Panama Canal Rainforest and the Foothills of Cerro Azul

Custom tour for the Rio Grande Bird Research Center

March 13-21, 2010

This program was focused on the area of Central Panama, including the Rainforest of the Panama Canal, Cerro Azul and one extra day at the Bayano Lowlands to get some Darien specialties. The Panama Canal rainforest proved to be one of the best places of the region to find birds, the first day at Pipeline Road and the Gamboa area yield a total of 174 species recorded in just one day!

We recorded a total of 373 bird species in seven days of birding, two National Endemics were seen and scoped, and these were **the Striped-cheeked Woodpecker** and the **Yellow-green Tyrannulet**. In addition, regional endemics such as **Sulphur-rumped Tanager**, **Black and Yellow Tanager** and **Violet-capped Hummingbird** were seen well too.

Some of the highlights of the trip were a **Pheasant Cuckoo**, that was seen and video taped at Pipeline Road, a couple of **Sunbitterns** that were found and seen for long time at Plantation Road, several **Blue Cotingas** seen at the Rainforest Discovery Center tower, the **Streak-chested Antpitta** was found at Pipeline Road and also at Plantation Road, and a **King Vulture** perched at Plantation Road that offered fantastic views. In addition to this, several Darien lowland specialties such as **Barred Puffbird**, **White-eared Conebill**, **Rufous-winged Antwren**, **Black Antshrike** and **Green Manakin** were seen at Bayano. We have to mention that at Sierra Llorona Lodge the food and the attention was excellent and the grounds offered excellent birding with **Crested Owl**, **Mottled Owl**, **Black and White Owl** and a **Common Potoo**. A tree just out the window of one of the rooms offered close up views of **Rufous-winged Tanager**, **Shining Honeycreeper**, **Blue-crowned Manakin**, and a male **Cerulean Warbler**!

Among others for the hole program we saw 6 species of Manakins, 50 species of Flycatchers, 5 species of Puffbirds, 5 species of trogons, 11 Wrens and 27 species of Tanagers.

This is a short list of some other highlights of the trip, see complete list below

Semiplumbeous Hawk; *one was found eating a lizard in Pipeline Road*

Pearl Kite; *Raymond found one in a tree on the way to Bayano, everyone had good views!*

Snail Kite; *a male was seen perched near Chagres River*

Rufescent Tiger-Heron; *fantastic views of an adult at the Gamboa wetlands*

Cocoi Heron; *seen flying and perched too, awesome views at Bayano Lake, one bird flew over!*

Savanna Hawk; *spectacular views of one individual on the grassy area of the Gatun Dam*

Kelp Gull; *this was a lifebird for many, two were seen at the Panama City mudflats*
 Black-throated Mango; *common at the hummingbird feeders near Pipeline*
 American Pygmy Kingfisher; *seen very close at the Trogon trail near Achioté*
 Great Jacamar; *awesome views at Plantation Road!*
 Pied Water-Tyrant; *two individuals were seen from the Bayano bridge*
 Royal Flycatcher; *great views, seen at Bayano*
 White-headed Wren; *at least four individuals were seen in a Cuipo tree at Achioté*
 Black-and-yellow Tanager*; *striking males were seen at Cerro Jefe*
 Rosy Thrush-Tanager ; *male and females seen at the Metropolitan Nature Park*
 Speckled Tanager; *two individuals were seen at close range at Birder's View (Cerro Azul).*
 Emerald Tanager; *seen well at Cerro Jefe and Birder's View*
